R & D Industries, Inc. (RDI)

Press Release

RDI named one of the fastest growing privately held companies in the US.

R & D Industries, Inc. honored by Inc Magazine / Inc-5000 list

Milford, Iowa, August 28, 2014: RDI has been recognized by Inc Magazine as one of the fastest growing privately held companies in the United States. The Inc 5000 placed RDI 3,475th out of approximately 27 million private US companies. This distinct honor places RDI in the top 1 percent of all businesses in the US.

RDI (RDI1.com) is a technology company that provides solutions to a variety of industries, including: government, small-large business, healthcare, hospitality and education. RDI has three divisions that focus on different areas of technology: Network Services (computer networking), Audio Engineering (professional audio-visual) and Thinix (software and managed solutions). RDI has four offices; Milford, Ames, and Cedar Rapids in Iowa and Sioux Falls, South Dakota.

"Our success is attributed to our team" said RDI president Don Van Oort. "We have an amazing team of people from all over the world. We're actively recruiting from over 30 universities and we work hard every day to provide old-fashioned, honest (Iowa) value for our customers. Trust isn't something which you can buy from vendors and partners, customers or employees. We focus on doing the right thing in everything we do, which has built a culture of excellence here. We have great customers, partners, and people. I'm extremely honored to be a part of such an amazing organization."

RDI is celebrating their 30th anniversary – another milestone. Van Oort continues "The thing about technology is that 'technology' by definition is ever-changing. Being able to build products that anticipate and capitalize on these changes is the hard part. Last year we redefined our core focus, by releasing our own internal 'Vision-2020', which defined our vision for the next 7-years." RDI is focused in several core technology areas: engineering, software development, mobile technologies, cloud services & virtualization, network infrastructure, security & monitoring, managed services, data protection and backup, wireless technologies, and 4G Internet connectivity.

For Immediate Release 7:00 AM EST, 8/28/2014

RDI has a wholly owned subsidiary named Thinix (Thinix.com), which has sales in over 100 countries around the world. Thinix's products including secure computing technology, software, managed services, guest-WiFi, and managed Internet connectivity solutions. Thinix recently introduced several new products at a series of trade events. Thinix DualFailover™ is a managed 4G backup Internet connectivity solution for organizations that need high levels of uptime, Thinix iStatus Monitor™ is an easy-to-implement Internet connectivity monitoring service, and Thinix ManagedConnectivity™ is a turn-key managed Internet and network security service.

RDI's Audio Engineering division (AudioEngineering.com) has been a leader in the professional audio-visual services market for more than a quarter century with over 1000 projects completed, 100+ certifications, and partnerships with the world's best equipment manufacturers. The Audio Engineering team works with architects, designers, and engineers to plan and install sound and video solutions for houses of worship, K-12/higher education, businesses, and government facilities.

RDI's Network Services division (RDIworks.com) is a regional leader in providing computer networking solutions to business, government, healthcare, and education. RDI Network Services prides itself on both their highly trained group of technicians and their valued technology partners, such as: Aruba Networks, Cisco, HP, Dell, VMware, Microsoft, Apple, WatchGuard, and Unitrends.

RDI is currently seeking several new employees who will be employed in the Ames, Milford, and Cedar Rapids, Iowa locations. For more information, please check: Thinix.com/jobs

About RDI:
